

June 1, 1982

MEMO TO FILE

RE: Urango
ACT/017/012
Garfield County, Utah

Mr. David Mercier was contacted on June 1, 1982 by phone and committed to informing his geologist, Mr. Sawyer, of his delinquent obligations to the Division. A letter of explanation is forthcoming as well as the after-the-fact drilling information. Comments on the mine water discharge will be included.

Mr. Mercier apologized for the problems and stated that they do intend to hold onto the leases, however, the mining operation is in a state of suspension. A formal notice of that suspension should be forwarded to the Division after review of the new information. A site visit should be scheduled for the summer.
